DAWNA JOY **DALUDADO**

DOCUMENTATION ENGINEERING | AI WORKFLOWS & AUTOMATION

djdaludado@gmail.com
Murrieta, CA, USA
linkedin.com/in/djdaludado

SKILLS

AI & AUTOMATION

Agentic Workflow Design
Claude Skill & Plugin Development
MCP Connectors & Tool Integration
Prompt & Agent-Instruction Engineering
Automated Documentation Pipelines
AI Output Review & Validation
AI Content Standards & Governance

ENGINEERING

Docs-as-Code Architecture
Git/GitHub Branch & PR Workflows
Markdown/MDX & YAML Frontmatter
Content Schema Design & Validation
AI-Assisted Scripting (Python, Shell)
CSS, XML/HTML5
REST API Documentation

TOOLS – AI

Claude Cowork
Claude Code
Claude Design
ChatGPT & OpenAI Codex
Google Gemini
Atlassian Jira Rovo
Model Context Protocol (MCP)

PLATFORMS & TOOLS

Git/GitHub
Next.js, MDX & Vercel
Zendesk Guide
Algolia
MadCap Flare
Atlassian Jira
Slack
Notion
Microsoft 365
Google Workspace
TechSmith Snagit,
Adobe Photoshop

PROFILE

Documentation engineering and AI workflow automation professional with 25+ years of experience transforming how technical content is created, managed, and delivered. Combines deep technical communication expertise with hands-on AI-assisted development, agentic workflows, and docs-as-code architecture. Builds practical automation solutions that connect engineering tools, streamline documentation processes, and improve content quality, efficiency, and the end-user experience.

EXPERIENCE

AGENTIC WORKFLOWS & AI TOOLING

- Built an agentic pipeline running the article workflow end to end – Jira intake, approval polling, draft generation, Zendesk Guide publishing – producing drafts that need only editorial review.
- Developed a library of custom Claude skills and plugins in Claude Code and Cowork: style-guide audits, ticket intake, Help Center search and publishing, Slack content-gap analysis, and scheduled pipeline runs.
- Integrated MCP connectors – Jira, Zendesk, Slack, Notion, GitHub, Google Drive – so agents act against live systems rather than pasted context.
- Delivered 4x the previous quarterly documentation output by integrating AI tools across authoring, review, and publishing workflows.
- Drove AI adoption across the documentation function: Claude (Cowork, Claude Code, Claude Design), ChatGPT, OpenAI Codex, Google Gemini, and Jira Rovo.
- Established AI content standards and human-in-the-loop review practices that keep AI-assisted output accurate, on-voice, and brand-compliant.
- Trained and mentored colleagues on AI tools and prompting techniques, extending agent-assisted workflows beyond the documentation team.

DOCS-AS-CODE PLATFORM

- Replatformed the customer help center from Zendesk Guide to a docs-as-code system – Markdown source in Git, Next.js/MDX frontend, Vercel hosting, Algolia search – live at docs.maxio.com in September 2026.
- Migrated 900+ articles into a structured repository with validated YAML frontmatter, a closed taxonomy, and lifecycle tagging enforced by an automated schema check.
- Rebuilt the taxonomy around customer jobs rather than internal product boundaries, so users navigate without product-history knowledge.
- Designed article-level AI affordances – Copy for LLM, Open in ChatGPT, share links, visible last-updated dates – keeping the corpus portable to any assistant.
- Built a docs-as-tests suite as a reusable Claude skill, running automated checks on links, metadata, builds, and content structure after each content update.
- Prototyped the site design in Claude Design; maintained frontend and content in separate GitHub repositories.
- Benchmarked the launched site against Stripe, Chargebee, and Zuora: first of four for customer-facing SaaS documentation, improving in all twelve evaluated areas.

EDUCATION

ELECTRONIC ENGINEERING TECHNOLOGY
with additional coursework in TECHNICAL WRITING
Cal Poly, San Luis Obispo, CA

CERTIFICATES

ADVANCED FLARE DEVELOPER
MadCap Certification 2020, 2016

THE ART OF API DOCUMENTATION
Udemy Online Course – Certification In-progress

GIT AND GITHUB FOR WRITERS
Udemy Online Course – Certification In-progress

MASTERING CSS
Udemy Certification 2020

ACTIVITIES & INTERESTS

Girls Volleyball Coach, Linfield Christian Middle School, Temecula, CA (2016 – Present)

VBS Leader and AWANA Volunteer, Reliance Church, Temecula, CA (2013 – Present)

Avid cookie baker and crafter

VERSION CONTROL & REPOSITORY OPERATIONS

- Created and maintain GitHub repositories for all custom AI assets – Claude skills and plugins, GPTs, Jira Rovo agents, and Jira automations – with documented setup and install scripts.
- Established repository standards – contributor guidelines, code-ownership review, branch-and-PR workflow, agent instruction files – and review and merge pull requests across both repositories

DOCUMENTATION PRACTICE

- Wrote and edited product documentation from SME interviews, functional and design specifications, and developer notes; set and enforced company standards.
- Ran SME review cycles under version control; tested and validated content against intermediate software builds, including context-sensitive help and navigation.
- Built and published deliverables in MadCap Flare with source control; packaged release candidates for QA sign-off and published to stakeholder SharePoint sites.
- Created style guides, topic templates, project plans, schedules, and budgets; implemented a documentation process supporting each phase of the software development cycle.
- Tracked documentation metrics, ran retrospectives and post-mortems, and implemented the resulting process improvements.
- Trained, mentored, and supervised contract technical writers.

OPEN-SOURCE PROJECTS

- Microsoft Learn – Contributor

WORK HISTORY

MAXIO — **Senior Documentation & Content Automation Specialist**
Remote Position — December 2021 – Present

SIEMENS DIGITAL INDUSTRIES — **Documentation Lead**

SOFTWARE — **Technical Editor, Principal**
Aliso Viejo, CA — April 2001 – September 2021

ADDITIONAL RELEVANT EXPERIENCE

INDX SOFTWARE CORP. — **Documentation Manager**
Aliso Viejo, CA — November 1999 – April 2001

TOSHIBA AMERICA — **Consultant, Document Solutions Engineering Division**
Irvine, CA — February 1999 – July 1999

OBJECTAUTOMATION, INC. — **User Education Manager**
Santa Ana, CA — January 1997 – October 1998
